Summary

Full-stack developer specializing in **Next.js**, **TypeScript**, and **Tailwind CSS**, with experience building responsive and performant web applications. Skilled in creating **modern UI/UX**, implementing animations with **Framer Motion** and **GSAP**, and deploying scalable applications using **Vercel**.

Currently studying a **Bachelor of IT (Cybersecurity)** at **RMIT University**, combining software engineering with security knowledge to build reliable and user-focused digital solutions.

Projects

✦ The Tor Photography Portfolio

<https://the-tor-portfolio.vercel.app/>

Developed a responsive photography portfolio using **Next.js**, **Tailwind CSS**, and **Framer Motion**, featuring animated galleries, multilingual support, and optimized static deployment on **Vercel** for fast performance and scalability.

✦ Giang Minh Wedding Invitation

<https://giang-minh.vercel.app/>

Developed a modern wedding website using **Next.js**, **TypeScript**, **Tailwind CSS**, and **Supabase**, featuring a real-time countdown timer, guest attendance tracking, digital invitation envelope, photo gallery, and wish submission system with responsive design.

✦ Cruehawts Shopping Pages

<https://cruehawts.com/>

Implemented custom **Shopify theme** modifications including **UI/UX refinements**, **navigation loading animations**, and **dynamic product media rendering** using variant **metafields**. Improved product gallery behavior and responsive layout while integrating **custom login inputs** and **removing default theme components**.
